

Better Next Time

Louise

It will be better next time baby
It will be better next time baby
(wait and see)
It will be better next time baby
It will be better next time baby
(comfort me)

(I see the sign)
Of someone who's lost their way
(in your eyes)
Your going to love, but your afraid
(with the time)
I notice in you, can feel this pain
(time can heal your heart)
You're just gotta, gotta have faith
It will be better next time baby
It will be better next time baby
(wait and see)
It will be better next time baby
It will be better next time baby

(with your life)
Look to the future
(don't deny)
Good things will come your way
(here am I)
Doing anything to make you mine
All you're got to do is open you're eyes

It will be better next time baby
It will be better next time baby
(wait and see)
It will be better next time baby
It will be better next time baby
(comfort me)
It will be better next time baby
It will be better next time baby

(here we go)

Of all the tears you shed
Will disappear
Of all the pain you felt
Will disappear
Of all the dreams you had
Are with me here

All you got to do is open you eyes

(open you eyes)

It will be better next time baby
It will be better next time baby
(wait and see)
(open your eyes)
It will be better next time baby
It will be better next time baby

(comfort me)

It will be better next time baby

It will be better next time baby

(wait and see)

(open your eyes)

It will be better next time baby

It will be better next time baby

(comfort me)
