

# In Walked Love

Louise

Once there were stars out in the night  
They never seemed to shine  
And love was there for every heart  
Seemed every heart but mine

That's how it seem'd to be  
Then darling you changed everything  
Just when I thought I'd given up  
Out walked loneliness

In walked love  
In walked you  
In walked all my dreams coming true  
Right through my door  
I saw your face and I knew  
All I'd looked for I had found in you  
I found the one that I'd been dreaming of  
In walked love

I threw my heart into the wind  
I'd thrown all hope away  
That love would never let me in  
And then you came away  
Just like a ray of light  
That breaks through the long cold night  
You brought in a brand new morning sun  
Out walked loneliness  
In walked love  
In walked you  
In walked all my dreams coming true  
Right through my door  
I saw your face and I knew  
All I'd looked for I had found in you  
I found the one that I'd been dreaming of  
In walked love

Out walked loneliness

In walked love  
In walked you  
In walked all my dreams coming true  
Right through my door  
I saw your face and I knew  
All I'd looked for I had found in you  
I found the one that I'd been dreaming of  
In walked love

In walked love  
In walked you  
In walked all my dreams coming true  
Right through my door
