

Change In The Weather

Love Spit Love

Watch out sweet thing
A change in the weather is all that you bring
Look up the weather's strange
The only thing we know that's gonna come for sure is change

Look at my life, go round and round
Hands on the clock still turning
Now I want it but I just can't see
I want that and that's just like me

Goodbye, bye kids
Where you gonna run from the things you keep hid
Look out the weather's strange
The only thing we know that's gonna stay the same is change

Look at my life, go round and round
Hands on the clock still turning
Now I want it but I just can't see
I want that and that's just like me

You know it's me
That picks you up
You know it's me
That puts you down

Watch out sweet thing
A change in the weather is all that you bring
Look up the weather's strange
The only thing we know that's gonna stay the same is change

Look at my life go round and round
Hands on the clock still turning
Now I want it but I just can't see
I want that and that's just like me

You know it's me
That picks you up
You know it's me
That puts you down
