

# Long Long Time

Love Spit Love

Sometimes it never rains  
It can't rain all the time  
And if I seem to make no sense  
I make no sense sometimes

Sometimes it never shines  
It can't shine all the time  
And I can't speak through one more scene  
I can't talk all the time

There's a promise in your mouth  
Is that what this was all about?  
We've got to suck it in and shout  
It's been a long, long time

Sometimes I never talk  
I can't talk all the time  
And I can't see to find my feet  
I can't sleep all the time

You've got to stop before you talk  
Because it's all been said before  
You can't stop knocking down my door  
It's been a long, long, long, long time

Sunday's child will fall from grace  
And heaven holds the hands that pray  
There's nothing here for me to say

With my name upon your face  
There's no one counting down these days  
There's no one here to hear you say  
It's been a long, long, long, long time

Sometimes it never rains  
It can't rain all the time  
And if I seem to make no sense  
I make no sense sometimes

Sometimes it never shines  
It can't shine all the time  
And I can't speak through one more scene  
I can't talk all the time

There's a promise in your mouth  
Is that what this was all about?  
We've got to suck it in and shout  
It's been a long, long time

You've got to stop before you talk  
Because it's all been said before  
You can't stop knocking down my door  
It's been a long, long, long, long time

Sometimes it never rains  
It can't rain all the time
