Lovebugs

Hey barbarella  
My babe interstellar  
The universe belongs  
To you and to me  
Hey barbarella  
My babe psychodelia  
When we're together  
All the planets stand still  
Hey barbarella  
My babe twisterella  
The milky way is made  
For you and for me  
Hey barbarella  
My babe what a fella  
When we're together  
All the stars shine so bright  
Get me high, let me fly  
Cross my heart and hope to die  
Sweetest lie, electrify  
But then you kiss goodbye  
Intensify, touch the sky  
Let me fall, and make me cry  
You imply to satisfy  
But then you leave me dry  
Why oh why oh why  
Hey girl  
What do you want  
You drive me crazy  
But I'm no debutant  
Hey girl  
What do you need  
You rip my heart out  
And then you let me bleed
