

# Never Get You

Lovebugs

You said  
'just take me away from sorrow  
And it doesn't matter where you go  
I'm always with you'

You said  
'can I spend a while with you please  
And I don't mind just what we do  
Only wanna loose myself'

I will never get you no no no  
I will never get you  
I will never get you no no no  
I already know it  
But can't help myself

I know  
It's wrong when I think I got you  
And when I understand your way  
I already lost you

And then when your flavour's almost gone  
And I get back my peace, you're here again  
Keep me awake all night
