

End Of The World

Lovex

Terror in the eyes of a child
Weapon in the arms of a woman
Survival in the heart of a killer

And here we are
Seeking for a revolution

But after all
Is there anything left to be amended

It will all be over any second now
Don't wait for tomorrow
Do us a favour and stop the dreaming

So it's the end of the world
It's the end of the world
Hey it's the end of the world

Smoke blocking the sun
Dust fading the shade of green
Can you now see the true colours

Of who we are
We're the essence of pollution

And face the truth
We're too late to be purified

It will all be over any second now
Don't wait for tomorrow
Do us a favour and stop the dreaming

So it's the end of the world
It's the end of the world
Hey it's the end of the world
It's the end of the world

And it's here
The day before tomorrow

After all we're too late
It will all be over any second now
Don't wait for tomorrow
Do us a favour and start believing

So it's the end of the world
It's the end of the world
Hey it's the end of the world
It's the end of the world
