

Got What I Came For

Lovex

My body feels so light
My soul is anxious to bloom
I'm not special in any other way
I'm just ready for my doom

There's absolutely no way you can make me break
No way to wipe the smile off my face

Come take me anywhere
Come take what's left of me
I've already got what I came for

Don't get me wrong
I only pity those
Who haven't yet loved

There's absolutely no way you can make me break
No way to wipe the smile off my face

Come take me anywhere
Come take what's left of me
I've already got what I came for

Now what are you waiting for
It won't come to you
It's not inside yourself
Don't give up the faith
Get your love to reach your peace
To lose your fears

Now what are you waiting for
It won't come to you
It's not inside yourself

Take me anywhere
Come take what's left of me
I already got what I came for
