

# Take A Shot

Lovex

Shot  
Take a shot

I see a thousand corridors  
(and) I've walked through them all  
Nowhere an open door

I'm imprisoned by my love  
Restrained by the fears  
Affection turned into tears

There's a part of me that just won't take the pain  
There's a part of me that wants to burst into flames  
And break all the chains

Take a shot  
Of my poisonous blood  
I've got a fever and it won't drop  
As long as you're in my life

Take a shot  
Of my poisonous blood  
I'm a fever and I'll burn you up  
So you'd better spit me out of your life

I'm the virus that tears you apart  
The disease that sucks the life  
Out of your faint heart

You need distance from me  
Rush to the arms of solitude  
It's the only cure

There's a part of me that just won't take the pain  
There's a part of me that wants to burst into flames  
And break all the chains

Take a shot  
Of my poisonous blood  
I've got a fever and it won't drop  
As long as you're in my life

Take a shot  
Of my poisonous blood  
I'm a fever and I'll burn you up  
So you'd better spit me out of your life

Cut me out of your life  
I wanna see  
You free of all the hurt that I have caused you

Take a shot  
Of my poisonous blood  
I've got a fever and it won't drop  
As long as you're in my life

Take a shot

Of my poisonous blood  
I'm a fever and I'll burn you up  
So you'd better spit me out of your life

Spit me out of your life  
Spit me out of your life  
Spit me out of your life  
Spit me out of your life
