

Take A Shot

Lovex

Shot
Take a shot

I see a thousand corridors
(and) I've walked through them all
Nowhere an open door

I'm imprisoned by my love
Restrained by the fears
Affection turned into tears

There's a part of me that just won't take the pain
There's a part of me that wants to burst into flames
And break all the chains

Take a shot
Of my poisonous blood
I've got a fever and it won't drop
As long as you're in my life

Take a shot
Of my poisonous blood
I'm a fever and I'll burn you up
So you'd better spit me out of your life

I'm the virus that tears you apart
The disease that sucks the life
Out of your faint heart

You need distance from me
Rush to the arms of solitude
It's the only cure

There's a part of me that just won't take the pain
There's a part of me that wants to burst into flames
And break all the chains

Take a shot
Of my poisonous blood
I've got a fever and it won't drop
As long as you're in my life

Take a shot
Of my poisonous blood
I'm a fever and I'll burn you up
So you'd better spit me out of your life

Cut me out of your life
I wanna see
You free of all the hurt that I have caused you

Take a shot
Of my poisonous blood
I've got a fever and it won't drop
As long as you're in my life

Take a shot

Of my poisonous blood
I'm a fever and I'll burn you up
So you'd better spit me out of your life

Spit me out of your life
Spit me out of your life
Spit me out of your life
Spit me out of your life
