Shot Take a shot

I see a thousand corridors (and) I've walked through them all Nowhere an open door

I'm imprisoned by my love Restrained by the fears Affection turned into tears

There's a part of me that just won't take the pain There's a part of me that wants to burst into flames And break all the chains

Take a shot
Of my poisonous blood
I've got a fever and it won't drop
As long as you're in my life

Take a shot
Of my poisonous blood
I'm a fever and I'll burn you up
So you'd better spit me out of your life

I'm the virus that tears you apart The disease that sucks the life Out of your faint heart

You need distance from me Rush to the arms of solitude It's the only cure

There's a part of me that just won't take the pain There's a part of me that wants to burst into flames And break all the chains

Take a shot
Of my poisonous blood
I've got a fever and it won't drop
As long as you're in my life

Take a shot
Of my poisonous blood
I'm a fever and I'll burn you up
So you'd better spit me out of your life

Cut me out of your life I wanna see You free of all the hurt that I have caused you

Take a shot
Of my poisonous blood
I've got a fever and it won't drop
As long as you're in my life

Take a shot

Of my poisonous blood I'm a fever and I'll burn you up So you'd better spit me out of your life

Spit me out of your life Spit me out of your life Spit me out of your life Spit me out of your life
