## The Only One

She never says hi to me no more And that's a pretty good way for her to even the score Things went bad, I guess it don't mean much She used to say I was the only one She never says hi to me no more

She never even looks my way no more And I can hear her talking through the bedroom door She's not here for me, cause we're all done I know damn well I was the only one I know damn well I was the only one She never even looks my way no more She never even looks my way no more
