

## Wandering Star

Lucero

The bands are done I should go home  
All my friends left a long time ago  
The girl serving drinks is the only one I know  
I got no good place to go

It's a wandering star that lights my way tonight  
On the city streets I call my home  
It's a wandering star that lights my way tonight  
I follow it 'till I am gone

The streetlights fade and disappear  
I can see the stars that are out here  
Cross the bridge to the country roads  
I'll follow that star wherever it goes

It's a wandering star that lights my way tonight  
On the city streets I call my home  
It's a wandering star that lights my way tonight  
I follow it 'till I am gone

Then I wander wherever it might roam  
The luckiest star to call my own  
And I wander 'till my hearts taken to rest  
And my star falls from the sky  
'cause falling stars are best
