Wandering Star

The bands are done I should go home All my friends left a long time ago The girl serving drinks is the only one I know I got no good place to go

It's a wandering star that lights my way tonight On the city streets I call my home It's a wandering star that lights my way tonight I follow it 'till I am gone

The streetlights fade and disappear I can see the stars that are out here Cross the bridge to the country roads I'll follow that star wherever it goes

It's a wandering star that lights my way tonight On the city streets I call my home It's a wandering star that lights my way tonight I follow it 'till I am gone

Then I wander wherever it might roam The luckiest star to call my own And I wander 'till my hearts taken to rest And my star falls from the sky 'cause falling stars are best
