

Stand Right By Each Other

Lucinda Williams

Something to strut hit all your feelings babe
Tell me what you want me to do
Is my constructive cry, as much as I cry babe

Tell me what you want me to do
We gotta stand right on each other
We gotta try harder babe
I got stand right by you
And you gotta stand right by me

Tell me what you want me to do
We gotta stand right on each other
They gotta try harder babe
I got stand right by you
And you gotta stand right by me

I gotta push myself but you gotta push yourself
I can't do it babe all by myself
We can make it better baby
Make her happy home
But you gotta help me, I can't do it alone

We gotta stand right on each other
They gotta try harder babe
I got stand right by you
And you gotta stand right by me

We gotta stand right on each other
They gotta try harder babe
I got stand right by you
And you gotta stand right by me

Babe I can do much, I won't give up that easy
So give me that much, baby don't give up on me
If you could see yourself the way see you babe
Then you could see for yourself that I don't want nobody else

We gotta stand right on each other
They gotta try harder babe
I got stand right by you
And you gotta stand right by me

We gotta stand right on each other
They gotta try harder babe
I got stand right by you
And you gotta stand right by me

Baby this is a sign and we got to fallow this time
Because I trap in the pill everything we got
And we got too much instead
Gotta do whatever it takes
I don't us to break up
So let's kiss and make up
