

Little Heroes

Lucky Dube

Little heroes, go down
The drain day by day
Future leaders they go down
The drains day by day
They cry so loud yeah
But the whole world
Is not listening
Only you mothers of the world
Can save the children
There's a lot of things
To be legalized yeah
But abortion is not an
Important thing here

How can you have a face
Of an angel
And let the devil inside of you
Take control
We tired of hearing these
Little voices crying out
From far away saying

Mama why do you
Destroy me
Mama what have I done
To you
I deserve to live like
Anybody else
We all come in this world
Not knowing where we gonna go
We all come in this world
Not knowing where life is
Gonna take us

Give them a chance in life
We're all taking our changes here
Life life life the greatest gift of all
I see the government officials
Sitting around a table
There's a law they gonna pass
Only you the mothers of
The world can save the children

Women's leagues
All over the world
Fighting for women's liberation
But who fights for
The children's liberation
We are tired of hearing
These little voices saying
