Sleepless nights don't bother me at all And if dawn comes I won't worry Something deep inside keeps me awake I wish that you were here right beside me

I recall when I was very young
And I could not fall asleep
My father sang me songs to make me tired
But memories don't come so easily

So goodnight, goodnight, wherever you are sleeping And I hope that if you dream, you dream of me Goodnight, goodnight, wherever you are sleeping And I hope that if you dream, you dream of me

Now I lie awake and it's no fun Tossing and I'm turning I'd call you if it weren't so very late But telephones won't bring you close to me

I recall the nights we stayed up late
Wide awake but still dreaming
There was nothing on this earth that could make me tired
But memories don't come so easily

So goodnight, goodnight wherever you are sleeping And I hope that if you dream, you dream of me Goodnight, goodnight, wherever you are sleeping And I hope that if you dream, you dream of me And I hope that if you dream, you dream of me
