## **I Had Something**

## **Lucy Kaplansky**

I had something, it fell from me Something strong like a pounding drum Like ringing bells when I was young I had something and it was gone

I had something, made me walk all night Made me run from home, made me fight I had something, made me feel alone Like an orphan waiting for a home

Every footstep that I take
Completes the circle my life makes
Every living thing has ties that bind
What I lost returns with love and time

I heard something, it called to me And it told me I was saved
Not by God and not by words
Not by any living thing

It was the voice that I once knew Of my daughter or my son Not yet born and not yet known Another orphan waiting for a home

Every footstep that I take
Completes the circle my life makes
Every living thing has ties that bind
What I lost returns with love and time

Every living thing has ties that bind What I lost returns with love and time
