

Prozac

Lucy Spraggan

I'm friends with Dr Jekyll so I heckled with Hyde
The motions of the potions made the oceans collide
I need some time away from you
Yes the rocket wouldn't stop it Saturn started to cry
Jupiter the stupid guy came down from the sky
I need some time away from you

And I try, and I try, and I try but they push me aside
And I cry, and I cry, and I cry then I hold it inside
They say I need this, they said I am not okay
Said I can't be this, they said take it anyway

The bester told the jester to crack him a joke
The jester froze in silence as he start to choke
I need someone to reach out to
The psychic was an addict and he trusted his plans
He gambled every penny on a roulette chance
I need someone to reach out to

And I try, and I try, and I try but they push me aside
And I cry, and I cry, and I cry then I hold it inside
They say I need this, they said I am not okay
Said I can't be this, they said take it anyway

You can watch me bleed out and you can clap and sing for more
You can ask me what it feels like to be a door

Freddy spoke to Jason as he told him he could
Jason said he wasn't sure that he understood
I need someone to help me through
The doctor told the patient that he could fix it
They coated all his feelings with a secret elixir
I need someone to help me through

And I try, and I try, and I try but they push me aside
And I cry, and I cry, and I cry then I hold it inside
They say I need this, they said I am not okay
Said I can't be this, they said take it anyway

They say I need this, they said I am not okay
Said I can't be this, they said take it anyway
