

I'll Never Be Lonely Again

Ludo

There's a star at the edge of the field where we kiss
Where I hold you and tell you I love you
And that star shine's its light
Through this young boy's window every night
As I lay here gazing, wishing for that love

But those young lover's days
Are still far away
If that star keeps consoling
I'll never be lonely
Again

On a hot Kansas night
I pulled you in tight
And gave you the words I'd been holding
I gazed in your twinkling eyes
And kissed you for the first time
And I felt my life suddenly gain meaning

But since then many days
Have pushed you away
If that star keeps consoling
I'll never be lonely
Again

Oh and my love
Those lover's days
Now they're so far, far away
If that star keeps consoling
Whoever you're holding
I'll never be lonely
Again
