Every Time I See You

Luke Bryan

It's like a bolt of lightning hits me in my chest Right out of the blue Every time I see you, every time I see you

Top of the world I'm standing rocking at my best Then I look like a fool Every time I see you, every time I see you

You're like a wreck out on the highway I can't look away and I can't pass through You're like an early morning Monday Bringing me down, messing with my mood

I'd love to say I can hold myself together But I can't help but come unglued Every time I see you, every time I see you

I wanna tell you everything I ever wanted to say But I never do Every time I see you, every time I see you

I'm sure my steering wheel and dashboard Would love a good break but they feel it too Every time I see you, why I gotta see you?

You're like a wreck out on the highway I can't look away and I can't pass through You're like a early morning Monday Bringing me down, messing with my mood

I'd love to say I can hold myself together But I can't help but come unglued Every time I see you, every time I see you, yeah

Oh, you're like a wreck out on the highway I can't look away and I can't pass through You're like an early morning Monday Bringing me down, messing with my mood

I'd love to say I can hold myself together But I can't help but come unglued Every time I see you, every time I see you Every time I see you, oh yeah

Oh, I'm walking down the street And you walk right up to me and I freeze Every time I see you
