Crucify My Heart

My hopes were running high Left me like a morning tide Everything I do is up to you

How can I still pretend All good things must end Emotions are so easy to crush

Like a junkie I traded everything for love

You were all I ever wanted Right from the start You were all I ever needed Crucify my heart

The tide has turned See my dreams drown Nothing new under this hollow sun

The stillness of the night Only thing holding me tight Emotions are so easy to crush

Like a junkie I traded everything for love

You were all I ever wanted Right from the start You were all I ever needed But you crucified my heart

Crucify my heart Crucify my heart

Like a junkie I traded everything for love

You were all I ever wanted Right from the start You were all I ever needed But you crucified my heart

You were all I ever wanted Right from the start You were all I ever needed But you crucified my heart

Crucify my heart Crucify my heart Lullacry
