

Let's take a drive  
I'll make you feel alive  
All we need is love and you and I together now

Just stand by me  
Take a look at the sky  
I can show you what is written in your destiny

Magical stardust oh its making me feel like  
We're in heaven baby me and you tonight yeah

Flying up high in the sky  
Oh with the beautiful stars  
Living in a movie now  
Kissing under raindrops (Wanna go)  
Let's see a whole brand new world  
Oh take my hand and you know  
You're in this movie too  
You're in this movie too

Romantic strolls  
Walking in fields of gold  
There 'aint nothing we can do that can't be done yeah

Lie next to me  
Take a look up above  
Let me show you everything you ever dreamed about

Magical stardust oh its making me feel like  
We're in heaven baby me and you tonight yeah

Flying up high in the sky  
Oh with the beautiful stars  
Living in a movie now  
Kissing under raindrops (Wanna go)  
Let's see a whole brand new world  
Oh take my hand and you know  
You're in this movie too  
You're in this movie too

Oh I'll make you forget your troubles  
They are all past and history  
Don't worry now me and you'll keep dreaming

Better with you and together  
Better be now and forever

Flying up high in the sky  
Oh with the beautiful stars  
Living in a movie now  
Kissing under raindrops (Wanna go)  
Let's see a whole brand new world  
Oh take my hand and you know  
You're in this movie too
