Come with me
Into a cool blue stream
Bleed into oceans green
Lips open wide, drinking the tide

Reach for me
Here where the ocean sea melts
And you sink with me deeper inside
I'll make you mine

Take me down
Down where their voices drown
Down where the only sound
Echoes for me

Take me down
Down where their voices drown
Down where the only sound
Echoes for me

Floating away under the waves Kiss me again, you'll tell me when salt on my lips Cool fingertips under the sea Stay here with me
