

Better Love

Luther Vandross

Lately I toss and turn at night
I hold my pillow very tight
Wake up to find the covers on the floor
I can't go on since you 've been gone
Sometimes I don't know what I'm livin' for

See I don't know what he told you 'bout the better life
His better cars and how he can treat you better
But none of that will keep you warm at night
He'll give you more
But who could have a better love

No no no no
A better love
A better, better love
Who could love you better?

There is no reason
Honey, you should ever worry what I'm doing
While you're gone, I'm being true to you
My fire burns for your return
And I'll just dream of you until' you do

See I never could replace your love with anyone's
I do believe it's easier said than done
No matter whose promises you dream of
Go search the world
You couldn't find a better love

No no no no no
A better love no no
A better, better love
Who could love you better?

Girl I never could replace your love with anyone's
I do believe it's easier said than done
No matter whose promises you dream of
Go search the world
You couldn't find a better love

No no no no no no no no no no
A better love no no
A better, better love
No no no no

You couldn't find a better love
No way
No one can give you better love
No way
You couldn't find a better love
No no way, no way
No no way, your love

[Incomprehensible]
Never never no no
Better better your love
Couldn't love you better better, no no

No one can love you better better
No no no no
Assigns the world
And no, no way, no way
No way, no way
