

# Hospital

Lydia

So I've been sleeping with this silence in my mind  
And all I see scares me  
And no one knows it, but she, she saved me

So I've been sleeping with this silence in my brain  
I wake up here everyday in this god damn place  
I won't wait here anymore

It's still not quite the way it was  
But you promised me this is love  
So stay and watch the hospital  
That's just across the street  
From your apartment balcony  
I'll never ever leave there  
I'll never leave

Oh, no one is watching now  
Sing like you just might drown  
But always come back home  
'Cause I never got to see you once more, no  
I guess that's all I wanted  
Yeah, I guess that's all I needed

Now look, we've made a fool out of love  
When all we want is to be enough  
When all we want is to feel enough

It's still not quite the way it was  
But you promised me this is love  
So stay and watch the hospital  
That's just across the street  
From your apartment balcony  
I'll never ever leave there  
I'll never leave

Watch the hospital that's just across the street  
(It's still not quite the way it was)  
From your apartment balcony  
(But you promised me this is love, so stay)  
I'll never ever leave there  
I'll stay here
