

Utopia

Lykke Li

We could be the most psychedelic
We could shine brighter than glitter
There's only one way up
We could be the most transcendent
Go deep like Dylan
There's only one way out

I see, I see, I see the dream in your eyes and I want it
It's burning bright like a fire from a comet
If there's a bomb in your heart I'll disarm it
If you want it then I want it

We could be utopia, utopia
You and me, utopia, utopia
We could be utopia, utopia
You and me, utopia, utopia

I don't wanna wait another lifetime
Just to get a dose of the high life

I see, I see, I see a light in your eyes and I want it
It's burning bright like a fire from a comet
Take your heart out the box, I won't harm it
If you want it then I want it

We could be utopia, utopia
You and me, utopia, utopia
We could be utopia, utopia
You and me, utopia, utopia
We could be utopia, utopia
You and me, utopia, utopia
We could be utopia, utopia
You and me, utopia, utopia

You told me ya, would stay with me
Stay in love, won't get enough
Cloud nine nine, mind body
You told me ya, would stay with me
Stay in love, never leave
You won't bow out, you won't run out, when all my shit's out
Utopia, utopia, utopia
Utopia, utopia
Utopia, utopia, utopia, utopia
Utopia, utopia
