

# Lights

M.I.A.

Lights they bend and [x23]

Lights they bend and jump and always move really fast  
Colors emerge light box had me in their grasp  
We be rocking, we be rocking, rockin' in the car  
Lights in sky goddess bumping the sitar

These lights yeah, These lights yeah  
Green color, looking nice yeah  
Turn it up too loud all the lights will turn red  
If you upstairs you can hear it in the bed  
Rainbows in my vision  
Move into the rhythm  
Electric shadows in my ears  
Got me dancing spinning  
Northern lights on my mind, all the colors rhyme  
Loving me all the time keep that on your timeline

I keep my distance even though I shine  
For me to tell you things, you need to be the right kind  
Even though it's clear like a street sign  
Some people don't get it so I keep 'em in line  
It's good to take a minute and take it all in  
It's so important sometimes that I blow off steam  
Got to get another sweater from my helicopter  
Got to get a closer look at what they all stick at

Doesn't need some lights that I used to trick out  
I got them from a Chinese dude I went to check out  
People need to get them, man, and put some in your pocket  
You might need some later when you finally unlock it

Lights on ring cameras and things  
Flashing like bling love, loving when I sing  
Sparkles on the charcoal  
As a fire lit up  
Headlights off a power in the city lit up

All I wanna do  
All I wanna do  
All I wanna do  
Is roll through the city, stargazing with you

Lights a selector  
Original nutter

I used to be a bad girl, now I'm even better!  
I don't keep no Beretta  
I don't sell like a shotta  
I don't often Twitter - they still see me as a threater  
I'm counter to the counter, put your money on the counter  
I'm standing at the counter, say "Hi" to my hunter  
I did as freaking santa  
I eat at Benihana!  
I can make 'em feel good, I'm runnin' youth centers  
I'm aiming for the center, sending light beams to sender  
I think we can make it, now sip a little winner
