

## Meds and Feds

M.I.A.

I just give a damn

Who says all the rules are made with rulers?  
We break em and break in their computers  
I ain't buying no more from them looters  
Who try to outschool us  
So we jump on our scooters  
I hope you understood us

I just give a damn

Hocus pocus, but you can't take away our focus  
We're growing up in middle of the digital ruckus  
You can say fuck us, I ain't putting on the stoppers  
We could be hackers making it like Lakers  
While we become workers you become golfers  
The modern day coppers beating on us for the papers

I just give a damn
