

Headed For A Fall

M. Ward

You may be peeking in your mailbox
You may be waitin' for a call
There might be only stars to see
If you're not waiting there for me
I believe you're headed for a fall
You may be staring in your mirror

Crying while you put your make-up on
Where you're gonna go tonight
To find the thing that makes it right
What will you do when you find it's gone

Don't put your dreams way up there in the clouds
I don't think that's what it's all about
You can't get much height when you're so above it all
I'll be waiting here when you hit bottom

I believe you're headed for a fall
We'll have days together in the sunshine
Autumn's twilight, winter's darkness too
Darling I will hold you, my love will enfold you
You need me now, just like I need you

Don't put your dreams way up there in the clouds
I don't think that's what it's all about
You can't get much height when you're so above it all
I'll be waiting here when you hit bottom

I believe you're headed for a fall
I believe you're headed for a fall
