

# The Frontlines

Machine Head

And I watched through bitter eyes  
As the blood filled in the cracks, black  
A burning effigy  
Told me I should kneel 'cause

I'm worshipping  
With terror, a disease  
Bum the sacred oil

They told us there'd never come a day  
They told us that we need not worry  
So we fucked around, thought this shit would change  
And turned our eyes away

I am the power siege  
And the rush you will feel, thrill  
Exploding out of me  
Through clenched teeth I will scream out

We're suffering  
With malice you deceive  
Puke sold as salvation

They told us there'd never come a day  
They told us that we need not worry  
So we fucked around, thought this shit would change  
And turned our eyes away

And I watched it slip away  
And you watched it slip away  
And we watched it slip away  
'Cause no one took a stand
