

X-Insurrection

Machines of Loving Grace

Will God help us when South Africa burns?
We're vicious creatures and we're all taking turns
Will God help us when the insurrection rages
We've got a drug, we're burning pages of love
(It's all I want, it's all I need)
The dead desire fertility, stolen from a distant scene
And all your drugs and your machines can't save you now
We will invoke forgotten names
Smash the sets of our hurricanes
And when we reach the living end we will begin again
Will God help us when America burns?
We're vicious creatures and we're all taking turns
Will God help us when the insurrection rages
We've got a drug, we're burning pages of love
(It's all I want, all I ever really need)
The dead desire fertility, stolen from a distant scene
And all your drugs and your machines....God help us
(Resurrection)
