

# The Power of Love

Macy Gray

They told me love don't stand a chance  
But I can't imagine the world without a drop of romance  
Never once stand alone, ever hand in hand  
We just be standing instead of just dancing

Honestly it's pretty ridiculous how we find feel but get meticulous  
And sorting out all of these differences  
Let's live a life in a different sight but fashion  
And fashion and the life out of what we imagine

Imagine a place where love takes away all the hate  
A place where this love permeates that said  
love don't stand a chance  
But I say it's the only chance we got  
The problem is no way we can't  
Come together, turn the I into us  
We'll come together with the power of love, it's like that
