

The Power of Love

Macy Gray

They told me love don't stand a chance
But I can't imagine the world without a drop of romance
Never once stand alone, ever hand in hand
We just be standing instead of just dancing

Honestly it's pretty ridiculous how we find feel but get meticu
lous
And sorting out all of these differences
Let's live a life in a different sight but fashion
And fashion and the life out of what we imagine

Imagine a place where love takes away all the hate
A place where this love permeates that said
love don't stand a chance
But I say it's the only chance we got
The problem is no way we can't
Come together, turn the I into us
We'll come together with the power of love, it's like that
