

Without You

Mad Caddies

I feel like I'm running in place
Sometimes I just need a little room to breathe
And I can't run for cover or seek from
Another every little thing I need
I said you're there for the good times for the bad times
And for the mid tempo days
But there is nothing that I've been through yet
Where the voice inside of me didn't say

[Chorus:]

Without you

Without you

There is nothing to hold on to

And the morning won't come

Without you

I know there's days when

I don't try hard enough for you girl

And every moment I can't always be there

And your love that I've been stealing well

I hope you know I'm feeling

That through all of this I really care

I said I move to the left side

And to the right side

Or anyway that you choose

Because the way that you make me feel

You know I never want to lose

[Chorus]

Oh when I wake up in the morning baby

And I see you lying next to me

There ain't nothing in the world going to take away my

Pain and come and set me free

[Chorus 2x]
