Without You

Mad Caddies

I feel like I'm running in place Sometimes I just need a little room to breathe And I can't run for cover or seek from Another every little thing I need I said you're there for the good times for the bad times And for the mid tempo days But there is nothing that I've been through yet Where the voice inside of me didn't say [Chorus:] Without you Without you There is nothing to hold on to And the morning won't come Without you I know there's days when I don't try hard enough for you girl And every moment I can't always be there And your love that I've been stealing well I hope you know I'm feeling That through all of this I really care I said I move to the left side And to the right side Or anyway that you choose Because the way that you make me feel You know I never want to lose [Chorus] Oh when I wake up in the morning baby And I see you lying next to me There ain't nothing in the world going to take away my Pain and come and set me free [Chorus 2x]
