

the ghosts of the past come haunting me  
i'm thinking about times that used to be

i past the park where i first got laid down by the canal  
where i met my mates  
we were the kids of the wall town  
misfits of society and it felt like no way out  
but we shouted it out proud

CHORUS:

smash down the world  
in the dangerzone  
smash down the world  
and we were not alone  
i don't mind the pain and the sorrow  
smash down the world  
in the dangerzone  
smash down the world  
and we were not alone  
and i still don't mind the pain

fighting, stealing, drinking and dealing  
to scared to shed a tear and show a feeling

we were young but we saw through your lies  
i raised the clenched fist with bloodshed eyes  
we were one for all and all against this world  
what ever happened back then, we still haven't turned into men

CHORUS:

just out for fun always hated your schools  
chased by the cops never believed in your rules  
but what you are is what you get  
that's what my mother said
