

Dangerzone

Mad Sin

the ghosts of the past come haunting me
i'm thinking about times that used to be

i past the park where i first got laid down by the canal
where i met my mates
we were the kids of the wall town
misfits of society and it felt like no way out
but we shouted it out proud

CHORUS:

smash down the world
in the dangerzone
smash down the world
and we were not alone
i don't mind the pain and the sorrow
smash down the world
in the dangerzone
smash down the world
and we were not alone
and i still don't mind the pain

fighting, stealing, drinking and dealing
to scared to shed a tear and show a feeling

we were young but we saw through your lies
i raised the clenched fist with bloodshed eyes
we were one for all and all against this world
what ever happened back then, we still haven't turned into men

CHORUS:

just out for fun always hated your schools
chased by the cops never believed in your rules
but what you are is what you get
that's what my mother said
