

Dirty City

Mad Sin

Well I've been here and I've been there
and in hell I shook the devil's tail
and I love to know that this old van brings me back
to the promised land

Fucked up, we're riding high!

I think about my girl and the time's passing by
and far out I see the neon light cloud

chorus:

We're back, ready to spread disgrace

We're back, still in war with the human race

I'm damned by birth and screwed by life

back to the dirty city

won't show you no pity in the dirty city

I've lost my heart and sold my soul

to the place where I belong

they tried so hard to keep me down

but I broke those chains and stood up proud

And you, better get back to your conspiracy home

and your charity events while I stay here

in the alley of fear!

chorus

Well this city is my mate and this city is my whore
my friends hang around and the girls ain't no bore

We're coming out to play, gonna make you pay

chorus x 2

Back to the dirty city, another social cripple

won't show you no pity in the dirty city!
