

Senseless Species

Mad Sin

The moon was shining bright as wicked loki crept into my mind
He was lost and buried in the mist of time and soon i found out
why
He took me to the past where everything began and back into the
future
To the end of the plan

Is it this way or was it that way
Turn your truth upside down
Everything you know is wrong
Is it this way or was it that way
Turn your truth upside down
We're the senseless species

Through space and time we traveled as my psychic condition
Began to fuck me up
Like the world around me it fell apart and left me here to rot
But loki laughed into my face and said "well it's ok, let's flush
this world
Right down the drain without feeling ashamed"

Back in the garden of chaos is where mankind belongs
And in the name of your god
The troops of the damned are marching on
And now you've got me locked up in a rubber room
But you're the ones that should be here and all your senseless
gods too

This way, that way, right way, left way, wrong way, my way
Yeah psycho!
