

So Alive

Madness

When I first saw you
I knew then from the start
You were the one i'd been waiting for
The one who had my heart
I saw it in your eyes
Girl then I realised its you
You put back passion in my day
You lift my life
You woke me up my darling
Every single night
I feel this fire inside
And I know the cause of it is you

I've always known that it was
Written in the stars
For you I'll ever fight or die
Since I met you girl
There's no confusion in my mind
I'll tell you why

You make me feel
So alive
Once in every life time
You may find the woman you can love
Once in every lifetime you get the chance to
Take a star from up above
And if you get the chance to find the woman of
Your dreams then hold her to you close
Then you give her all your loving
All that loving all your loving
That she loves the most

I've always known that it was
Written in the stars
For you I'll ever fight or die
Since I met you girl
There's no confusion in my mind
I'll tell you why
You make me feel
So alive

I've always known that it was
Written in the stars
For you I'll ever fight or die
Since I met you girl
There's no confusion in my mind
I'll tell you why
You make me feel
So alive
