## **Fancy Clown**

## Madvillain

I knew you was f\*\*kin' around Playing all innocent and hoeing since the foundation Don't make have to pound his thin crown face in And risk being jammed up like traffic inbound from space in

There's been a place for you in my heart since we first met A teenage love and didn't feel no hurt yet My boys warned you was poison like BBD first cassette And still I put all my chips on the worst bet

Gave up the skirt, now I gotta hear it from the street How dare you drag my name in the dirt and cheat? You coulda broke it off and ended it and dipped And if you spoke soft coulda still preserved the friendship

Now you apologize that's why they all say You wasn't sorry when you sucked him off in the hallway But have it your way, raw no foreplay That's you if you want a dude who wear a mask all day

And just to think, I used to be proud of you And you had some real good power

Probably kissed me that same evening I should be hurling Matta fact, gimme back my bracelet and my sterling I rather waste it or give it for ya girlfriend She did let me stab it last week while you was working

Remember our vacation out to Maryland?

I duked the maid, Carolyn, she made me throw the towel in Like all fool men the times I hit ya moms off

I told her knock it off but she had to set the rocket off

Ain't enough room in the f\*\*kin' town
When you see thin head tell 'em be duckin' down
I'm not rompin' around, he better be armed
Ready and prepared to be stomped in the ground
