

## Sic Semper Tyrannis

MAE

Tonight a black out  
A panic attack planned with no time to figure it out  
We've issued a code red already dead  
No open sight no beacon of light that said

Don't give it away  
You want the truth so get some answers now

All hands on deck we're going down  
All hands on deck we're going down

Screaming the end is near  
So rest in peace cause we're the ones that put ourselves here  
Water rises now hold your breath and count down  
This ship of sinners and saints are just waiting to drown

Don't give it away  
You want the truth so get some answers now

All hands on deck we're going down  
No plan but ours can save us now  
So try and understand  
Since we got lost and we get tossed around  
All hands on deck we're going down

Of all the chaos and order there's no drift to catch the law of  
the unknown  
To take refunds of your boarders where the truth is that we all  
must die alone

All hands on deck we're going down  
No plan but ours can save us now  
So try and understand  
Since we got lost and we get tossed around  
All hands on deck we're going down
