

# Red Dress

**Magic!**

You

She's tried on everything  
Every little thing inside her closet  
And she knows it's getting late  
Knows that I been waiting and I'm starving  
Cause we been working overtime  
She wants to make a night that we'll remember  
And I'm staring at the time  
Thinking it's alright, put on whatever

But I've been on my best behaviour  
Pacing back and forth  
And 10 thousand lifetimes later  
When she walks through the door

I said hey you with the red dress on  
I gotta find a way to take it off  
I got a lot of love and it's growing strong  
When I see you with your red dress on  
You in that red dress  
You in that red dress

Yeah, it's hard to concentrate  
Finish up your plate, she whispers to me  
But I got one thing on my mind  
As they pour the wine and it consumes me

But I've been on my best behaviour  
Not to cause a scene  
But when we finally get home later  
It's just you and me

And I said hey you with the red dress on  
I gotta find a way to take it off  
I got a lot of love and it's growing strong  
When I see you with your red dress on  
Hey you with the red dress on  
I gotta find a way to take it off  
I got a lot of love and it's growing strong  
When I see you with your red dress on  
You in that red dress  
You

Hey you with the red dress on  
I said hey you with the red dress on

Hey you with the red dress on  
I gotta find a way to take it off  
I got a lot of love and it's growing strong  
When I see you with your red dress on  
You in that red dress  
You with that red dress on  
You with that red dress on
