

In the name of progress  
they created the machine  
A chain reaction, things unforeseen

can it see me, will it read my mind  
does it feel me, it's not far behind  
feed it knowledge  
our mistake from the past

In the future will we lose control?  
This wizardry will take it's toll  
We set out to answer  
to search the unknown  
did we end up in a road to nowhere

[solo]

It's a matter of time before we see the day  
When we realize that  
we're trapped in the maze

[solo]

It reads the code, with it's one track mind  
will technology cause the end of mankind?  
the age of innocence lost, at whose cost?

In the future will we lose control?  
This wizardry will take it's toll  
We set out to answer  
to search the unknown  
did we end up in a road to nowhere
