

Breath of Life

Magnum

Here we are again
Always dream of places
Near and far
All those different faces
I'm going to take it like a breath of life

Here we are again
We don't make much difference
Never start
Pray for our forgiveness
Then we take it like a breath of life

From the wilderness all of us climb
Just a blink at the end of all time
Every day watch the sun on the rise
Always looking, the moon and the stars in our eyes

From the wilderness all of us climb
Just a blink at the end of all time
Every day watch the sun on the rise
Always looking, the moon and the stars in our eyes

So here we are again
Like a dream unfolded
Every star
Every theme exploded
Still we take it like a breath of life

From the wilderness all of us climb
Just a blink at the end of all time
Every day watch the sun on the rise
Always looking, the moon and the stars in our eyes

From the wilderness all of us climb
Just a blink at the end of all time
Every day watch the sun on the rise
Always looking, the moon and the stars in our eyes

Keep burning bright, way beyond time
No shadows light up this long empty night

From the wilderness all of us climb
Just a blink at the end of all time
Every day watch the sun on the rise
Always looking, the moon and the stars in our eyes

From the wilderness all of us climb
Just a blink at the end of all time
Every day watch the sun on the rise
Always looking, the moon and the stars in our eyes
