Everyday

Magnum

There's no confusion, no talk of losing It's one thing I know real well You've got the power, steal every hour As far as I can tell

This fascination's an education I do enjoy the ride Over and over, these feelings come closer It's something you really can't hide

Time flies by Don't know why

But every day of my life I could fall for you, like I always do Every day of my life I would crawl to you, like I always do

No past, no future, won't try to fool you I know I'll get it right I can't do it your way, and do what you say This ain't no back street fight

This fascination's an education I do enjoy the ride Over and over, these feelings come closer It's something you really can't hide

Time flies by Don't know why

But every day of my life I could fall for you, like I always do Every day of my life I would crawl to you, like I always do

I hang on your words, I get lost in your eyes Help me to promise, but teach me to lie Take me to somewhere, that I've never been Show me the magic, that I've never seen

Every day of my life I could fall for you, like I always do Every day of my life I would crawl to you, like I always do

Every day of my life I could fall for you, like I always do Every day of my life I would crawl to you, like I always do
