

# Hard Road

Magnum

You stand there alone  
Talk to yourself always  
And nothing you say  
Will ever change your day  
No one comes near  
You're too far away  
And nothing is clear  
There's nothing to say

You always take the hard road  
And people say you're a bad seed  
Take the hard road  
You always take the hard road  
That's really something you don't need  
Take the hard road

Now look at your face  
Shrouded in black, eyes closed  
You run to the door  
It's always the same  
You don't care any more  
No one comes near  
You're too far away  
And nothing is clear  
There's nothing to say

You always take the hard road  
And people say you're a bad seed  
Take the hard road  
You always take the hard road  
That's really something you don't need  
Take the hard road  
Take the hard road

All that you do  
Always goes wrong  
It's just up to you  
Maybe you're taking too long

You always take the hard road  
And people say you're a bad seed  
Take the hard road  
You always take the hard road  
That's really something you don't need  
Take the hard road

You always take the hard road  
Take the hard road  
You always take the hard road  
Take the hard road
