

From the mountains near the river
Floating wild into the sea
All my hope I now deliver
That your light shines over me

When the night is falling, guide me on my way

Asteria, Asteria
Almighty goddess of the stars
I'm calling you, Asteria
You bring greatness to my heart
The nightshade becomes golden
When your spirit lights the dark

As I stare into the darkness
My emotions rising high
I am riding through the forest
On my journey near the sky

When your stars are shining, I can never fail

Asteria, Asteria
Almighty goddess of the stars
I'm calling you, Asteria
You bring greatness to my heart
The nightshade becomes golden
When your spirit lights the dark

All my life I fought for justice
With your guidance on my side

Asteria, Asteria
Almighty goddess of the stars
I'm calling you, Asteria
You bring greatness to my heart
The nightshade becomes golden
When your spirit lights the dark
