

# On a Mountain High

Majesty

I'm standing here on a mountain high  
Defender of the damned  
My battle cry sounding through the air  
All over the land  
I'm waiting here for my time to come  
To ride down to the field  
The time is now, let the thunder roar  
And strike with holy steel

With his hammer of doom, like a light in the gloom  
He is riding in the sky  
He is joining our fight, yes, he's here on our side  
See the freedom in his eyes  
Before the battle began, only a hand full of men  
Faced the army of the dark  
we had hope in our mind, but the fear made us blind  
Feel his bond deep in our hearts

High from the stars  
He's coming down for war  
He is our chosen ally

On a mountain high  
We seed the rider, guarding of time  
On a mountain high  
He's the avenger, pay back their crimes  
From the gods he's sent to help and defend  
Our folks oppression must end  
Hear his battle cry  
On a mountain high

He cracks their bones and their heads, all those creeps must be dead  
He's bringing justice, pride and joy  
Is it really the end, will our environment amend?  
Start to build up what's destroyed!

But we should not be too sure, that we're safe and secure  
There's a noise from far away  
It sound like evil and fear and slowly it's getting near  
Can he face that beast of prey

High from the stars  
He's coming down for war  
He is our chosen ally

On a mountain high  
We seed the rider, guarding of time  
On a mountain high  
He's the avenger, pay back their crimes  
From the gods he's sent to help and defend  
Our folks oppression must end  
Hear his battle cry  
On a mountain high

On a mountain high  
We seed the rider, guarding of time  
On a mountain high

He's the avenger, pay back their crimes  
From the gods he's sent to help and defend  
Our folks oppression must end  
Hear his battle cry  
On a mountain high

I'm standing here on a mountain high  
Still armed and bound to fight  
Which test is still being imposed on me  
I'm waiting for a sight
